Solid Pneumatic Tires

The solid pnuematic tire is very similar to the pneumatic tires, but without the air inside. Solid Pneumatics, which are made of solid rubber puncture proof and much longer life .Replacement for pneumatic tires. they are used most widely in all small field running vihicles for varity of materal handling equipment.

WonRay Solid forklift Tires all designed to 3 layer construction , It is the most popular and welcome constructure for solid tires.

1st layer - It with Bead wire in heel, steel ring reinforced . Make sure the tires strong enough to fit the rims and no slip.

2nd Layer - With Cushion Rubber Center. To make sure the tires with better cushion function and shock absorption . Good for the forklift and also more comfortable for the operator.

3rd Layer - With Wear resisting tread. Special technical material in used to make sure the tires have longer life and be used on different kinds of poor working environment.

Brand

WonRay[®] and WRST[®] are two brands registed by Yantai WonRay Rubber Tyre CO.,LTD.

Non Marking Tires

Any size of solid resilient tires or press on tires can be made into non marking tires. The color can be made according to the requirement of customers. White, Grey, and Green color are the most welcome color for non marking tires. Non marking tires also be called as no mark tires, they are designed to operated where clean floors are priority, No mark will left on the ground when it is running or braking. Espicially suitable for the application of enterpriseds where contamination is strictly prohibited. Such as pharmacy, Catering trade , textile, electron, aviation, etc.

Clip Forklift Tires

Clip forklift tires with special design , it is more easy to fit with rims than normal solid tires . So also known as easy assembly tire, or easy fit tires. or click type, commonly known as "the nose" tires, is based on the characteristics of Linde folklift. Some times we also call it "Linde Forklift Tires"
